React Developer | Frontend Engineer

An React developer with a strong IT background and 4+ years of experience working in medical billing. Skilled in React.js, JavaScript, JSX, HTML5, CSS3, and component-based frontend development.

Experienced in building data-driven user interfaces, handling application logic, validations, and automation workflows. Strong understanding of frontend architecture, state management concepts, REST-ready data handling, and cross-functional collaboration. MCA graduate in Full Stack Development with hands-on exposure to modern web technologies and cloud fundamentals. To secure a React Developer / Frontend Developer role where I can design and develop scalable, high- performance web applications using React.js, JavaScript, and modern frontend practices, while leveraging my strong IT foundation, data-handling expertise, and continuous learning in cloud and full- stack technologies.

WORK EXPERIENCE

Accumed

08/2023 – Present

Senior Claims Administrator

Chennai

- Prepare, review, and submit medical insurance claims to private and government payers (electronic and paper).
- Analyze and resolve complex billing issues and discrepancies, including denial management and error correction.
- Perform follow-up on unpaid or rejected claims and resubmit as needed to achieve successful adjudication.
- Generate reports to monitor billing activity, claim status, and key performance indicators (KPIs).
- Serve as a subject matter expert for billing processes, medical terminology, and payer requirements.
- Identify trends in claim rejections and recommend corrective process improvements.
- Maintain accurate and compliant records in billing systems and software.
- Liaise with insurance companies, internal departments, and external stakeholders to resolve billing disputes.
- Support training or mentoring of junior billing staff and assist with policy guidance when needed.

Athena HealthCare

07/2021 - 08/2023

Issue Resolution Analyst

Chennai

- Resolved complex system-level issues involving data mapping, package configuration, and master data alignment.
- Extracted backend data and generated structured reports to support MIS and operational decisions.
- Automated repetitive workflows, saving approximately 8 hours per day and improving system efficiency.
- Ensured consistency and governance across enterprise systems, reinforcing attention to application data integrity.
- Communicated technical findings clearly to stakeholders via documentation and coordination.

EDUCATION

Master of Computer Applications (MCA) – Full Stack Development

Jain University

Bangalore • 01/2024

- Frontend & backend development fundamentals
- Web technologies, application architecture, and deployment concepts

Bachelor of Commerce – Information System Management

SRM Arts & Science College

Chennai 01/2021

Information systems, data handling, and business-technology alignment

SKILLS

- JavaScript (ES6+), React.js, Responsive Web Design, UI Logic
- React & Frontend Technologies (ATS Focused): Component-based Architecture, Conditional Rendering, CSS3, Form Handling, Functional Components, Hooks (useState, useEffect – learning advanced patterns), HTML5, JSX, Reusable UI Components
- Tools, Libraries & Workflow: Excel, Git & version control (basic workflow), Power BI (basic visualization), Power Query (automation & transformation)
- Automation & Scripting: JavaScript logic building, Python (basic – scripting & automation)
- Cloud & Deployment (ATS Keywords): AWS fundamentals (EC2, S3 – learning), Azure fundamentals (learning), Exposure to scalable web application concepts
- Technical Proficiency Snapshot: AWS & Azure fundamentals (learning), CSS, HTML, JavaScript, Power BI (basic), Power Query, Python (basic), React.js, SQL, structured data handling
- Strengths & Competencies: Clear technical documentation and communication, Fast learner adapting to new frameworks and tools, High attention to detail in UI and data handling, IT mindset with business-domain understanding, Strong logical thinking and problem-solving
